- Phase I — Initiation
- Phase II — Planning ←
- Phase III — Execution
- Phase IV — Monitoring
- Phase V — Closing

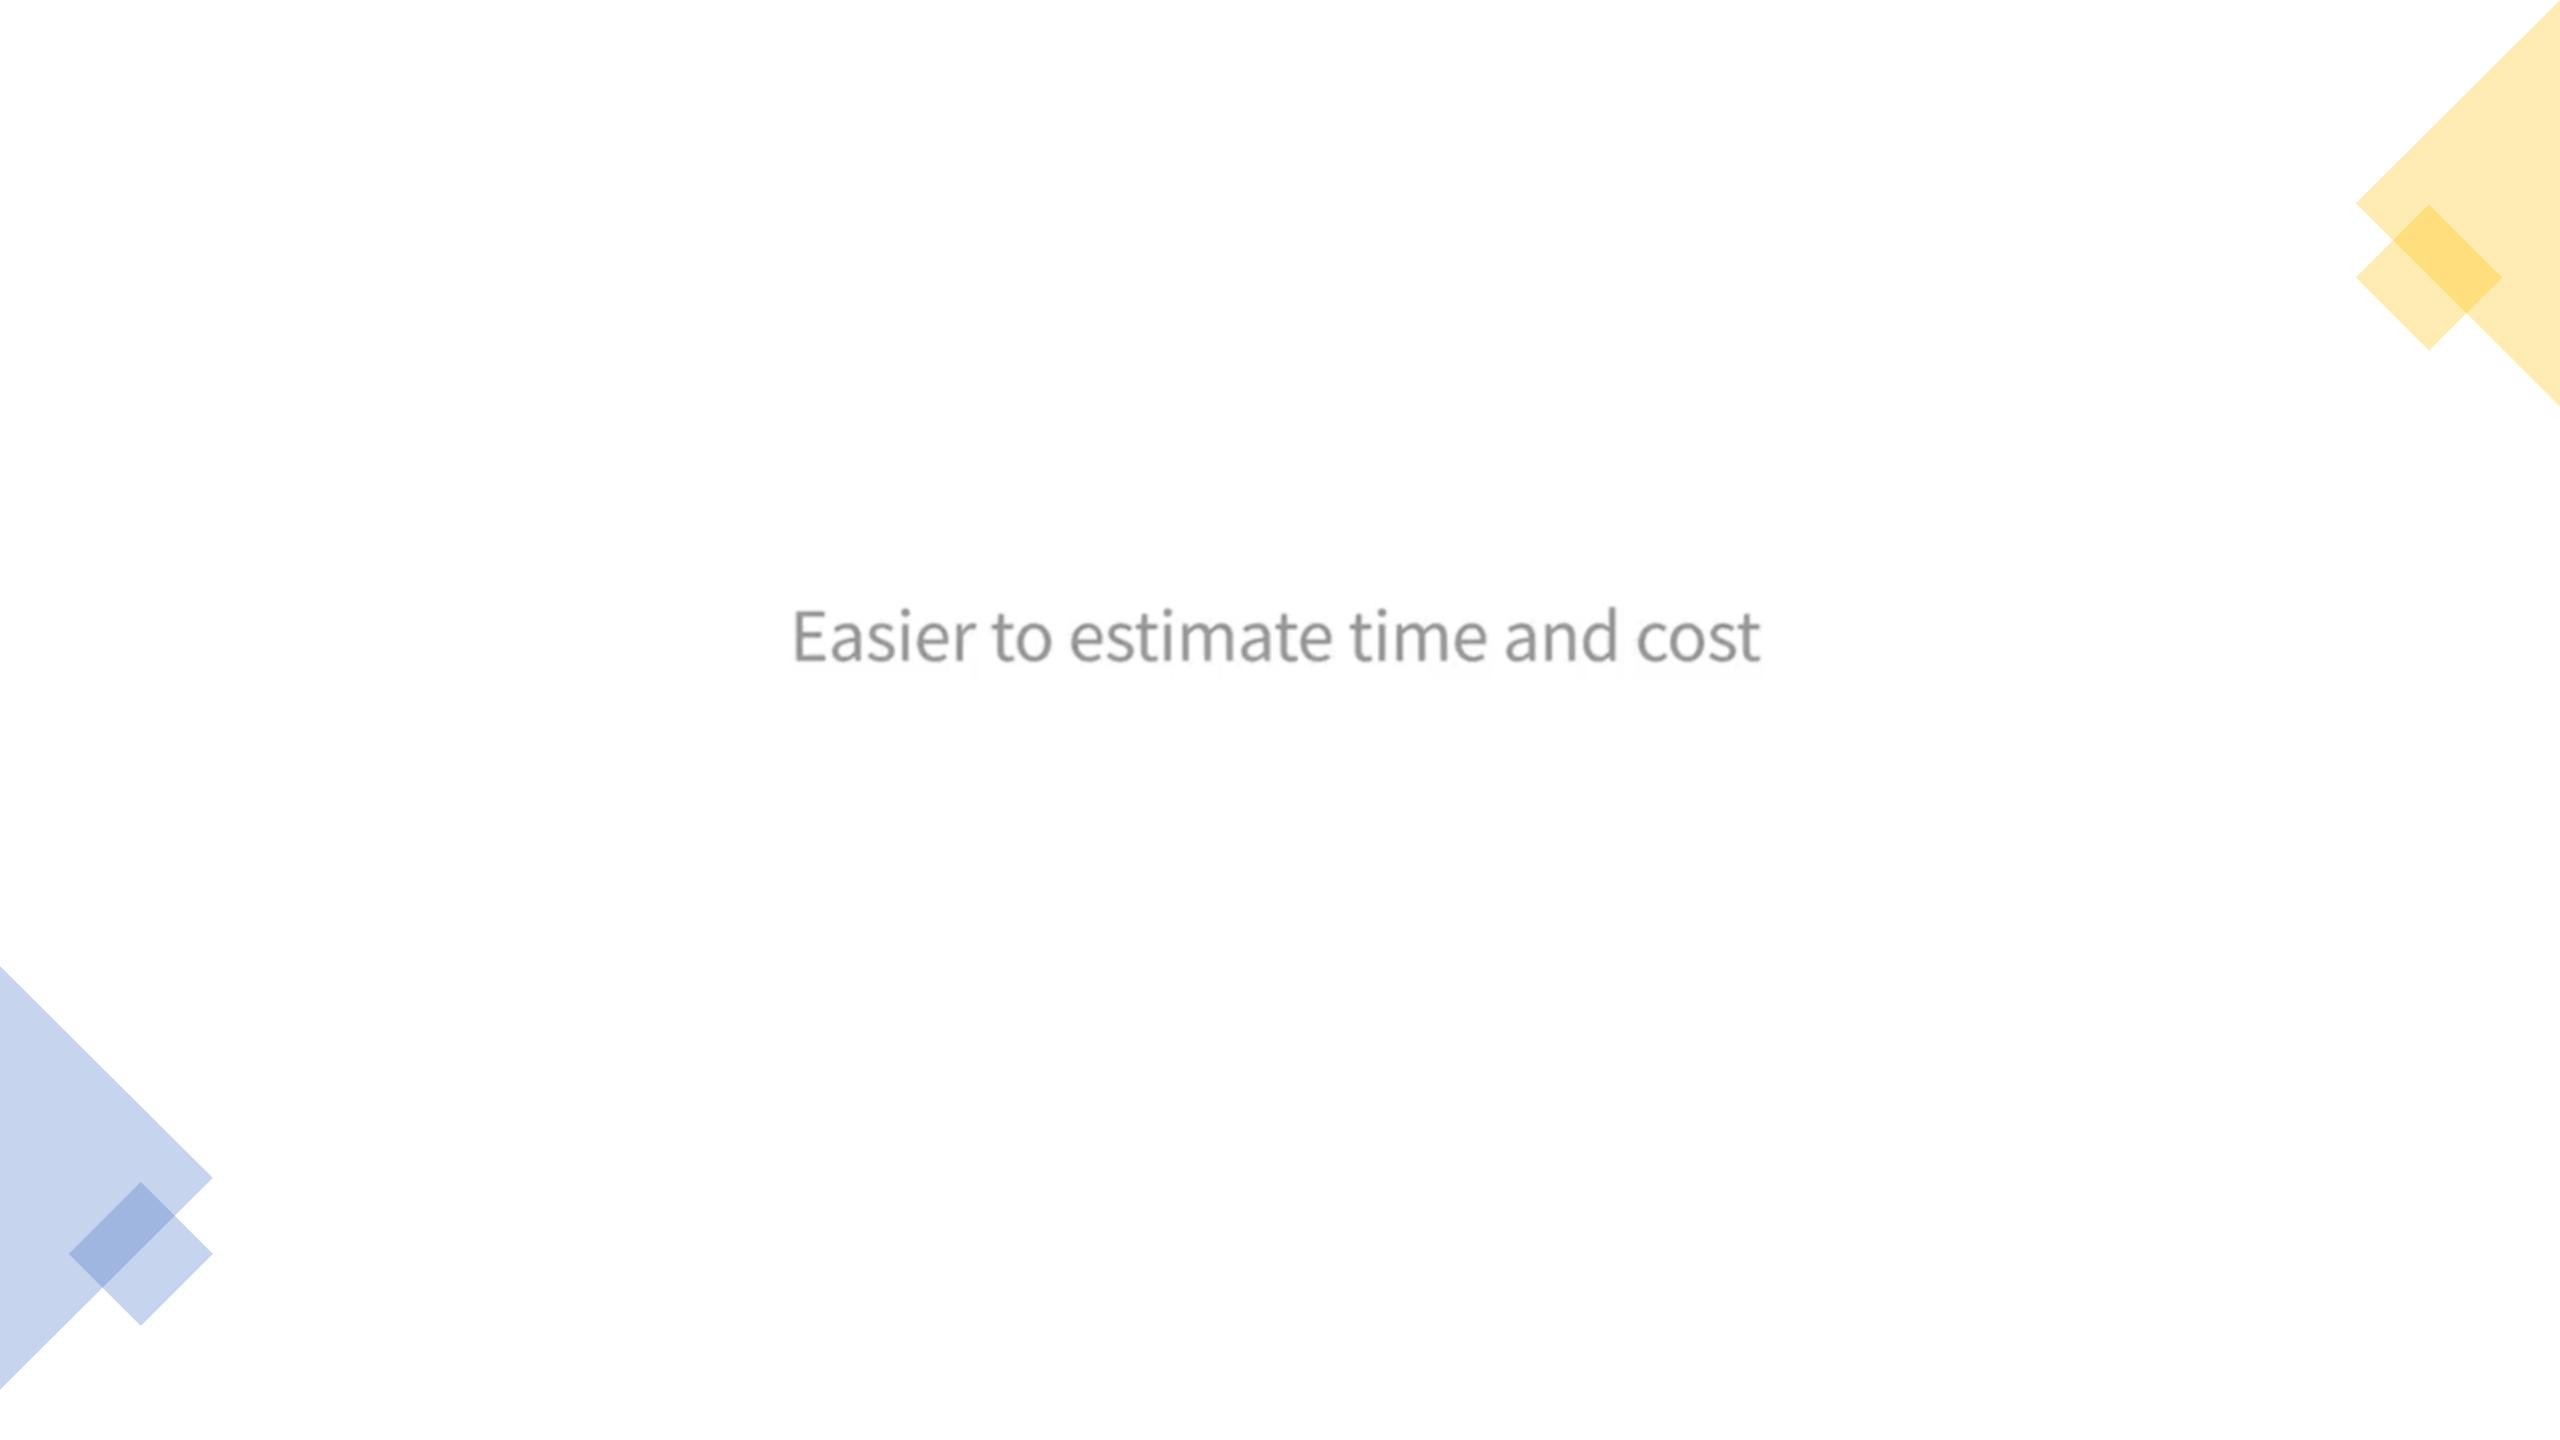

# Building a WBS

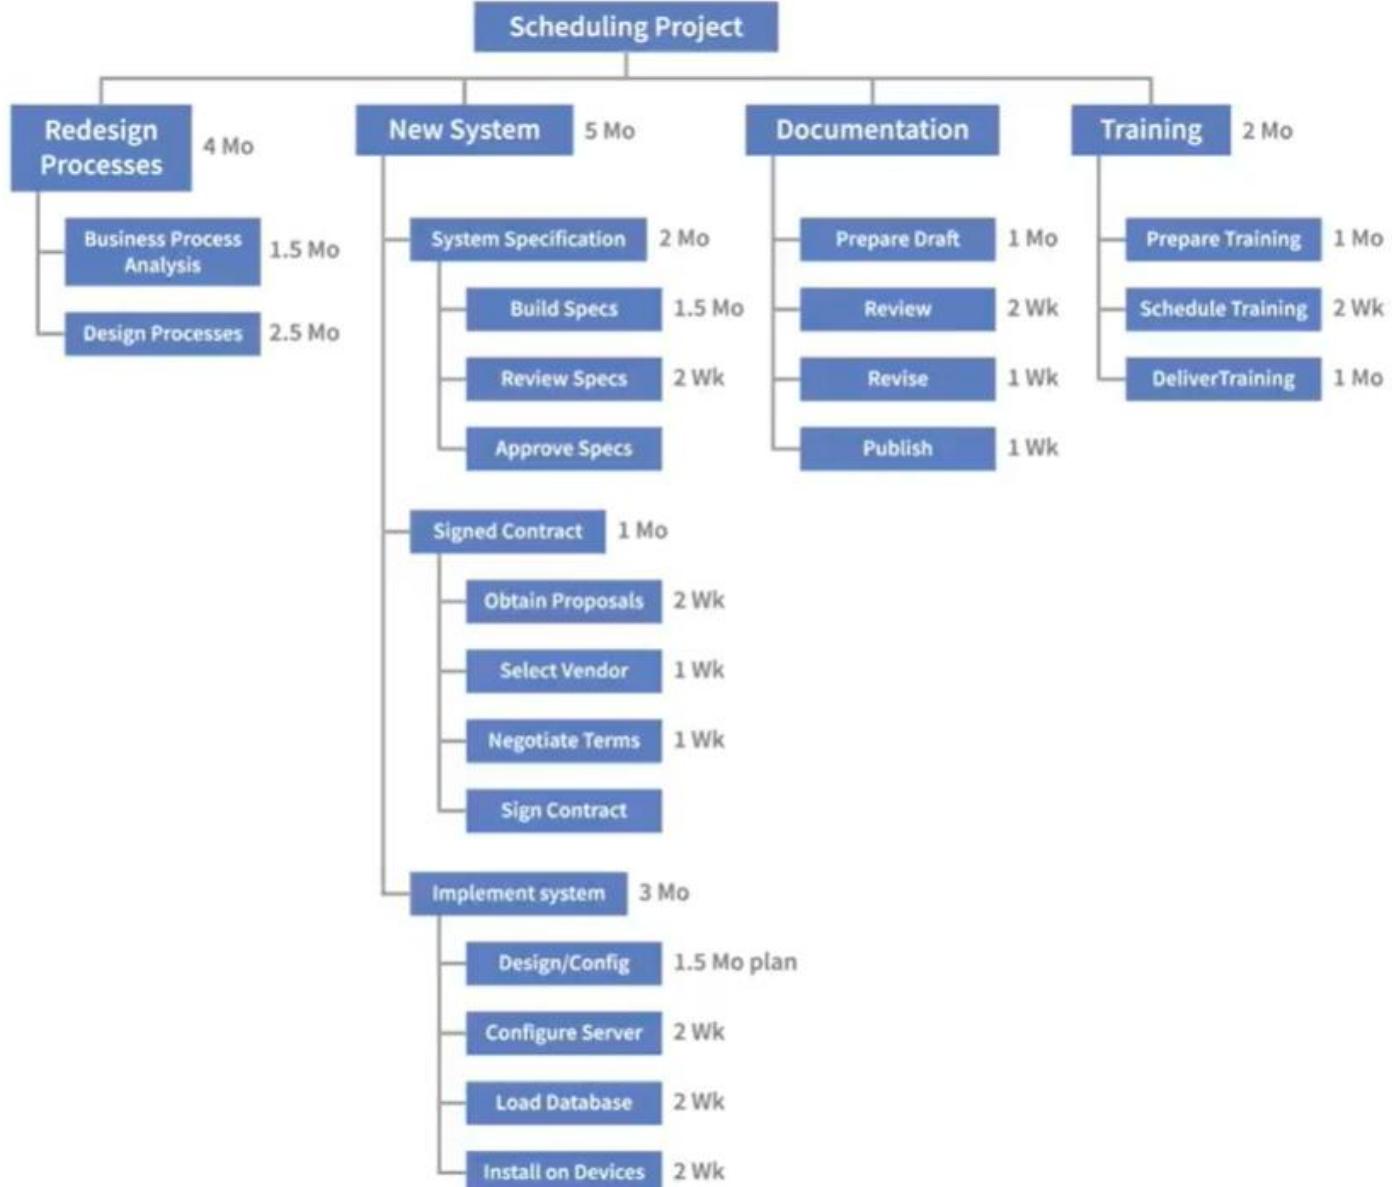

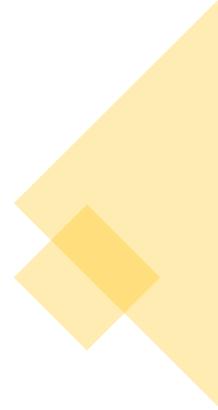

# Work Breakdown Structure (WBS)

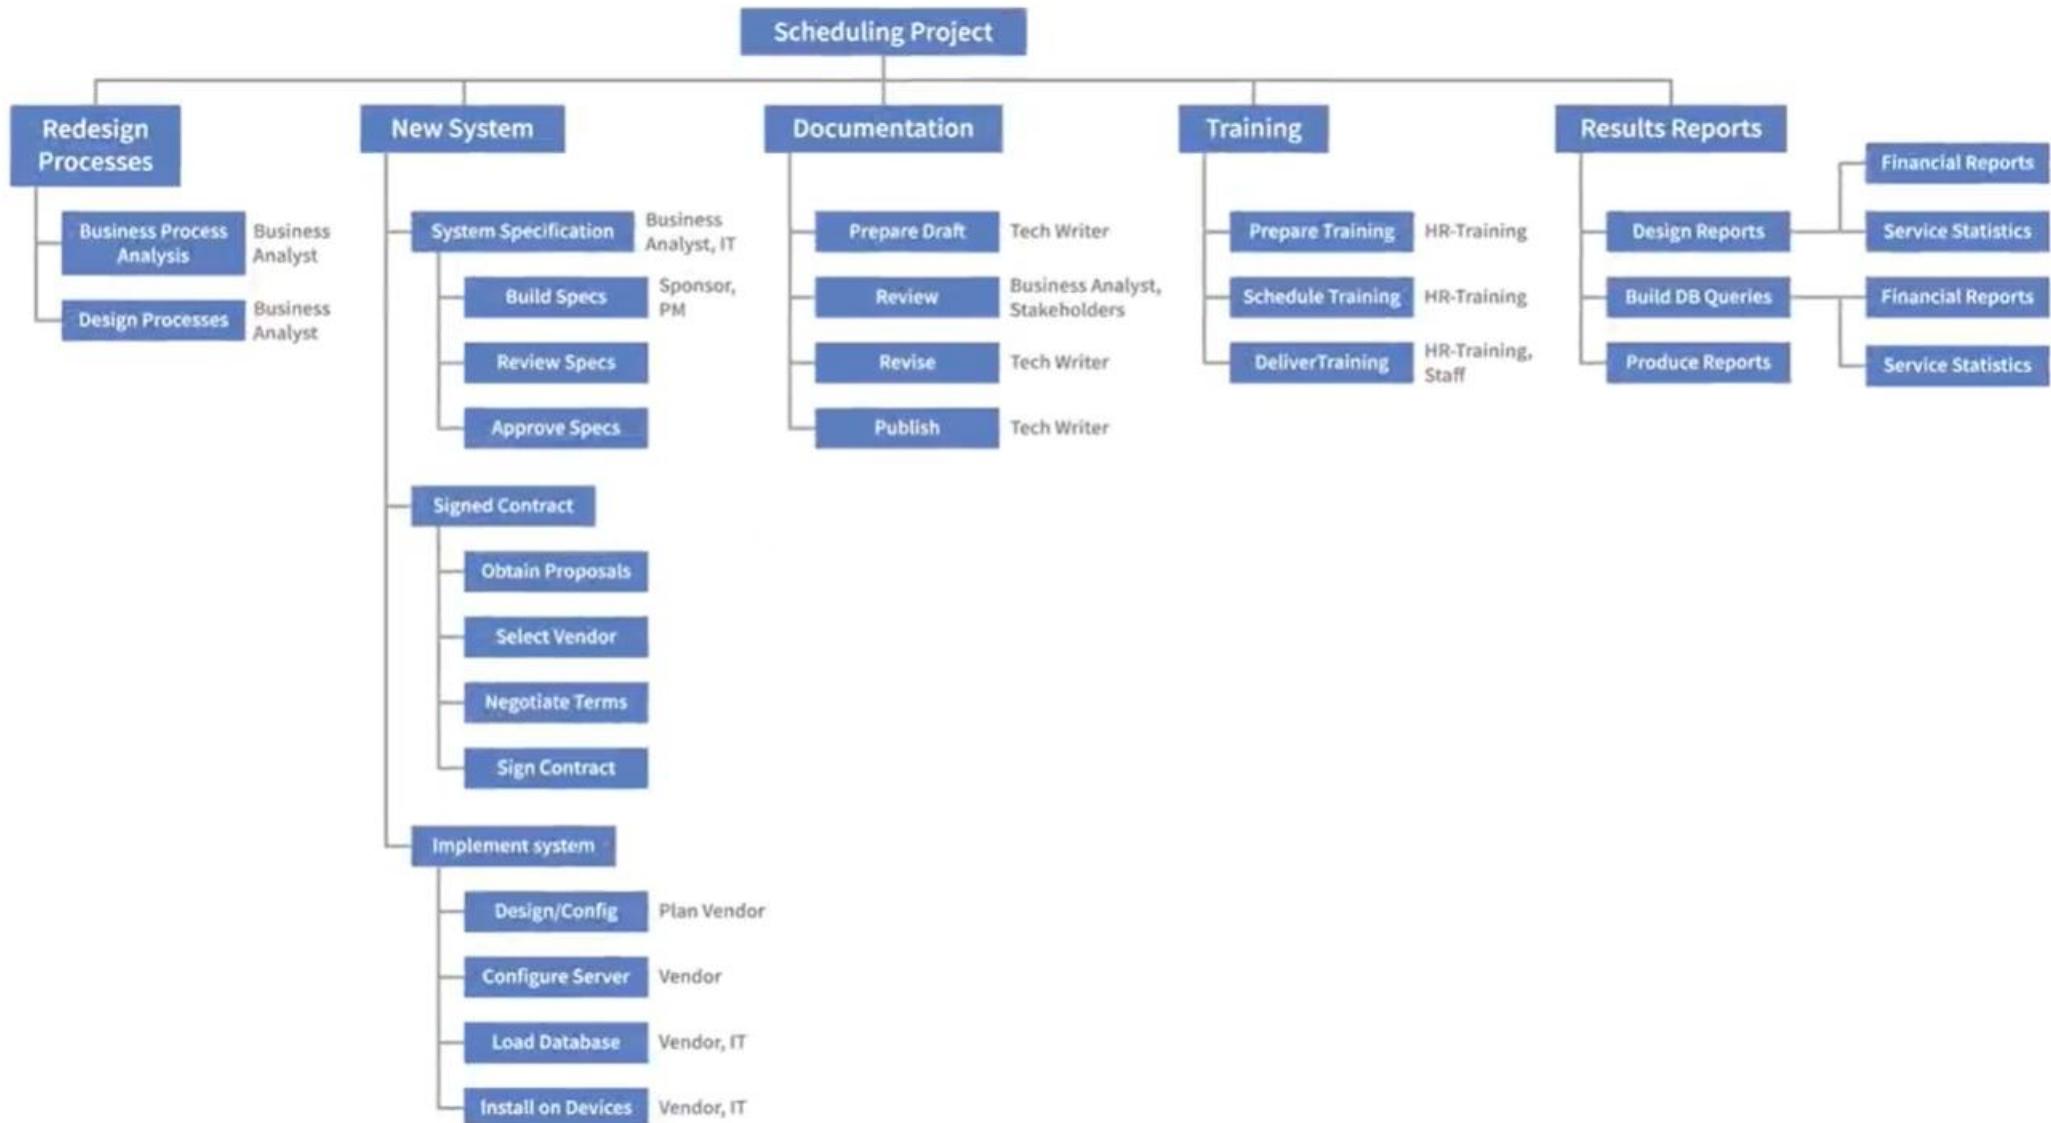

Easier to estimate time and cost

Easier to assign work

# Work Packages

---

- Lowest level in WBS

# Determining Breakdowns

---

- Time and cost are easy to estimate
- Status is easy to measure
- Task durations are shorter than reporting periods
- Details are manageable

## Scheduling Project

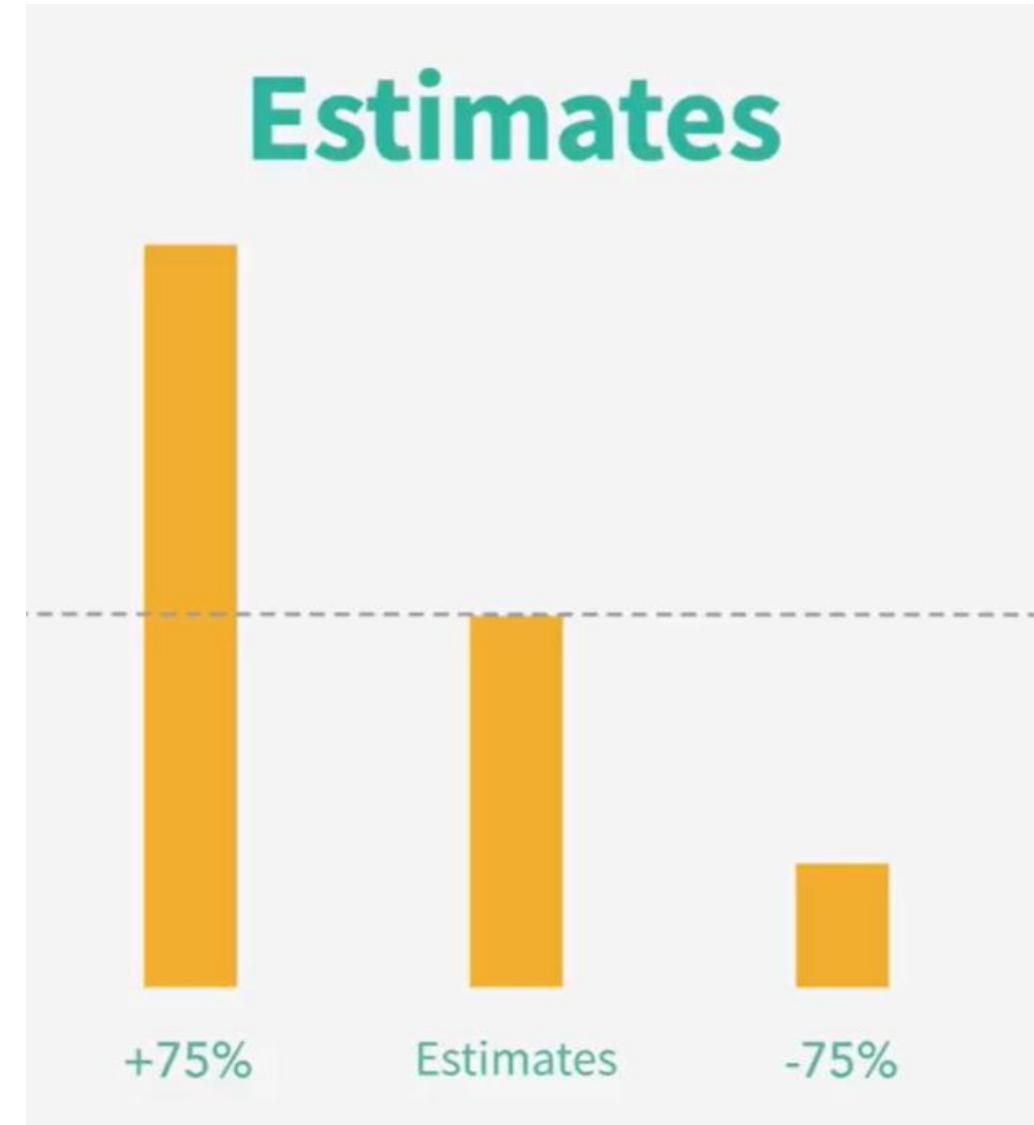

|                            |  |
|----------------------------|--|
| <b>WBS:</b>                | 4.2  |
| <b>Work Package:</b>       | Schedule training  |
| <b>Package Owner:</b>      | Bekir Berk   |
| <b>Owner Organization:</b> | Sport, Culture and Health Department   |
| <b>Participants:</b>       | Bekir Berk, Trainer  |
| <b>Description:</b>        | <p>Create a schedule of training sessions so that each session has a maximum of 8 attendees.</p> <p>Schedule sessions before the start of shifts so staff can attend training before starting their shifts.</p> <p>Send invites to all staff who will use the scheduling system and provide three session options.</p> <p>Develop the training schedule to assign most people to their first choice.</p> |
| <b>Completion State:</b>   | All scheduling staff are assigned to training sessions and have accepted the final invitation.   |
| <b>Reference Docs:</b>     |  |

estimate time and cost

Total Labor Costs

\$9.700

# Staffing Plan

---

- Identify sources for resources
- When are they needed
- Training requirements
- Resource processes

# Project Schedule

- 1.** Put tasks in sequential order.
- 2.** Estimate the time each task will take.
- 3.** Assign tasks to project team members.
- 4.** Calculate task duration.
- 5.** Account for deadlines and other constraints.
